

Launch SONAR. If the plug-in is no listed in the Audio FX list, run the VST scanner.

Create or open a project.

Add new audio track, set the input to a mono source

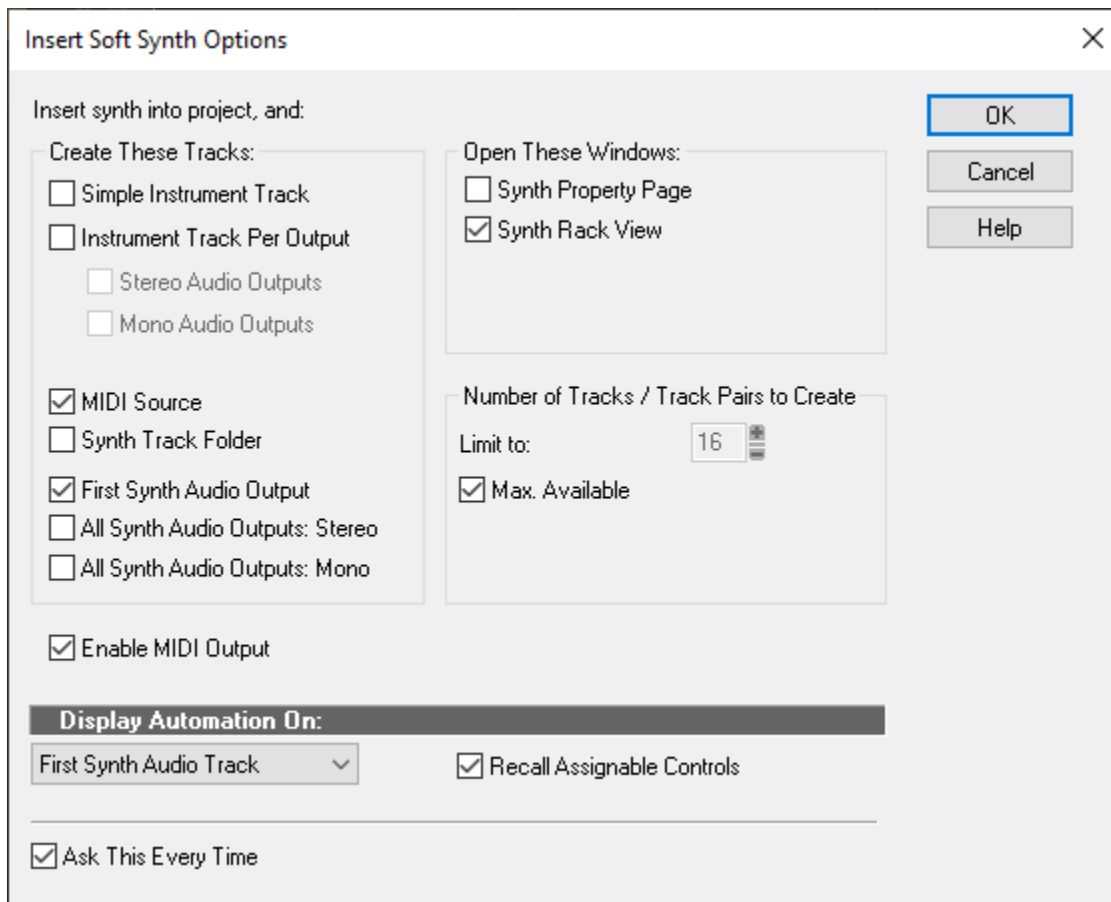

Insert MIDI Guitar 2 into FX bin or ProChannel..

The MIDI Guitar 2 program will open.

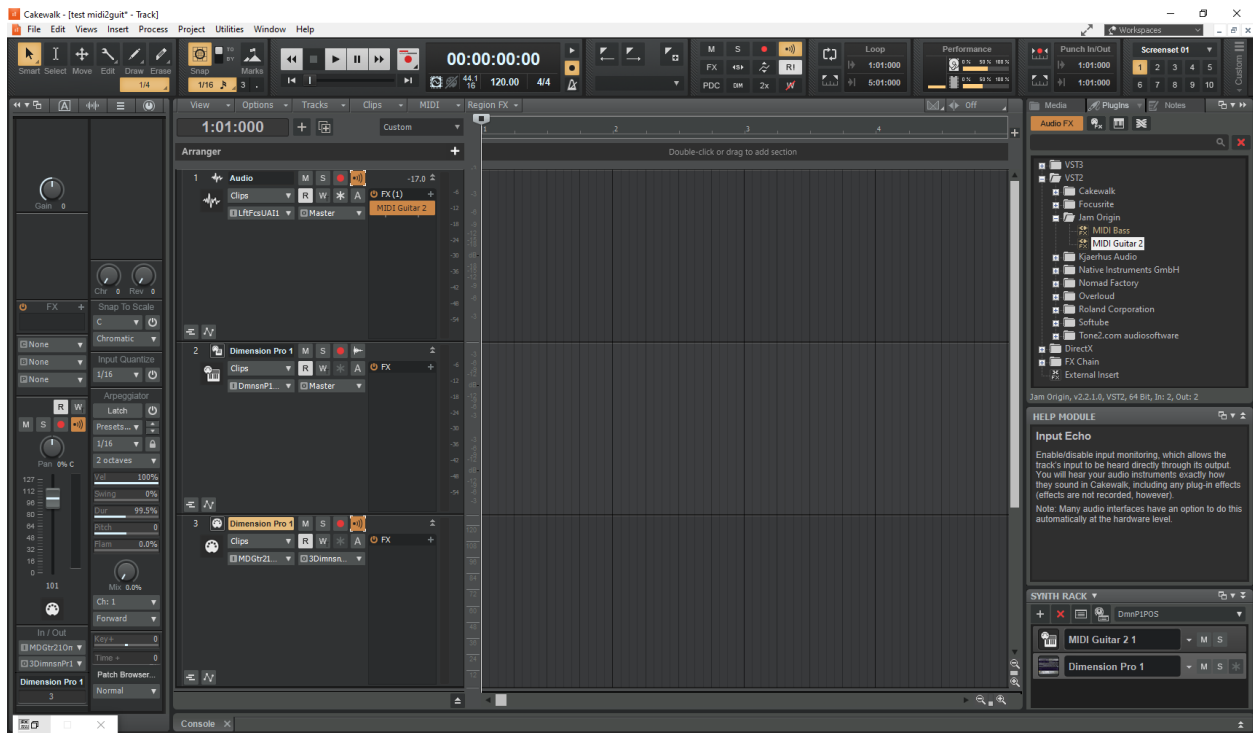

To record MIDI data from MIDI Guitar 2, using the VST2 drop down in the plug-in header at the top of the screen of MIDI Guitar 2, click "Enable MIDI Output" ..

Minimize MIDI Guitar 2

Add a new synth track using the Synth Rack view.

Make sure both the MIDI Guitar audio track and the synth (Instrument or MIDI) track have input echo enabled.

To change Synth from the Midi2Guitar assigned instrument, go to Midi2Guitar program and change the instrument to the synth you want then change the sound that you want in the Cakewalk program by clicking on the Synth name in the Synth Rack view
